Index of Subjects

AIDS, routine surveillance data on, and HIV infections in the UK: description of the data available and their use for short-term planning, 157

Bluetongue, the epidemiology of, in Malawi, 493
Bordetella pertussis, immunogenicity of specific, surface antigens in diphtheria–tetanus–pertussis (DTP) vaccines, 335

Campylobacter, high prevalence of, excretors among Liberian children related to environmental conditions, 227
Campylobacter, the relationship between intestinal, species isolated from animals and humans as determined by BRENDA, 379
Campylobacter jejuni, experimental colonization of broiler chicks with, 27
Campylobacter jejuni, the extent of surface contamination of retailed chickens with, serogroups, 17
Cannulae, bacterial adhesion to intravenous: influence of implantation in the rabbit and of enzyme treatments, 91
Cervical neoplasia, class-specific herpes simplex virus antibodies in sera and cervical secretions from patients with: a multi-group comparison, 455
Chicken, the vertical transmission of salmonellas and formic acid treatment of, feed, 43
Chickens, the extent of surface contamination of retailed, with *Campylobacter jejuni* serogroups, 17
Chicks, experimental colonization of broiler, with *Campylobacter jejuni*, 27
Cholera, epidemic, in Mali: high mortality and multiple routes of transmission in a famine area, 279
Clostridium botulinum, factors affecting the toxicity of rotting carcasses containing, type E, 399
Clostridium difficile infection in patients with haematological malignant disease, 63
CMV, the status of, as a human pathogen, 1
Corynebacterium diphtheriae, the use of SDS–polyacrylamide gel electrophoresis epidemiological studies of, 83
Culture system, a microbial, for use in remote field environments, 271
Cytomegalovirus, computer matching of oligonucleotide patterns on electrophoretic gels: an application to the epidemiology of, 467

Diarrhoea, a three-year diagnostic and epidemiological study on viral infantile, in Rome, 311
Diphtheria–tetanus–pertussis, immunogenicity of specific *Bordetella pertussis* surface antigens in, (DTP) vaccines, 335

Egg protein, serological examination of IgE- and IgG-specific antibodies to, during influenza virus immunization, 291
Enterobacteriaceae, occurrence of multiple antibiotic resistance and R plasmids in, isolated from children in the Sudan, 73
Enterobacteriaceae suppression by three different oral doses of polymyxin E in human volunteers, 407
Escherichia coli, correlation between electrophoretic types B_1 and B_2 of carboxylesterase B and host-dependent factors in, septicaemia, 51
Escherichia coli, faecal colonization with P-fimbriated, between 0 and 18 months of age, 185
Escherichia coli, managemental influences on the selective proliferation of two strains of haemolytic, in weaned pigs, 213

Foot-and-mouth, response to, vaccines in newborn calves. Influence of age, colostral antibodies and adjuvants, 135

Gonococci, plasmid content and protein I serovar of non-pencillinase-producing, isolated in Munich, 345

Haemophilus influenzae, nasopharyngeal carriage and antibiotic resistance of, in healthy children, 193
Hepatitis B, HTLV-1, HIV-1, and hepatitis delta in the Pacific and South-East Asia: a serological survey, 153
Hepatitis B markers in Lancashire police officers, 145
Hepatitis delta, HTLV-1, HIV-1, hepatitis B and, in the Pacific and South-East Asia: a serological survey, 153
Herpes simplex, class-specific, virus antibodies in sera and cervical secretions from patients with cervical neoplasia: a multi-group comparison, 455
HIV-1, HTLV-1, hepatitis B and hepatitis delta in the Pacific and south-East Asia: a serological survey, 153
HIV, routine surveillance data on AIDS and, infections in the UK: a description of the data available and their use for short-term planning, 157
HTLV-1, HIV-1, hepatitis B and hepatitis delta in the Pacific and South-East Asia; a serological survey, 153

Influenza A, host cell-mediated selection of, (H3N2) virus variant subpopulations: lack of association between antigenic and receptor-binding properties, 511
Influenza, antibody responses of swine to type A, viruses during the past ten years in Japan, 523
Influenza, location on the evolutionary tree of, H3 haemagglutinin genes of Japanese strains isolated during 1985–6 season, 301
Influenza, protection against experimental infection with, virus A/equine/Miami/63 (H3N8) provided by inactivated whole virus vaccines containing homologous virus, 501
Influenza, serological examination of IgE- and IgG-specific antibodies to egg protein during, virus immunization, 291

Leptospiral, the bacteriological prevalence of, infection in cattle and buffaloes in West Malaysia, 239

Measles in developing countries. Part I. Epidemiological parameters and patterns, 111
Measles in developing countries. Part II. The predicted impact of mass vaccination, 419
Milk, an appraisal of methods used in the examination of retail samples of cows, 369
Mycoplasma pneumoniae, Red-cell IgM-antibody capture assay for the detection of, -specific IgM, 101

Police officers, hepatitis B markers in Lancashire, 145
Polymyxin E, enterobacteriaceae suppression by three different oral doses of, in human volunteers, 407
Poultry, costing of a hospital-based outbreak of, -borne salmonellosis, 35
Poultry meat as a source of human salmonellosis in England and Wales, 175
Poxvirus, human, infection after the eradication of smallpox, 321

Rotavirus, isolation and characterization of, from feral pigeon in mammalian cell cultures, 481
Rubella, specific IgG subclass antibody in, virus infections, 443

Salmonella, animal, surveillance in Peninsular Malaysia, 1981–1985, 351
Salmonella bareilly, a study of the epidemiology of, in India using a new phage-typing system, 221
Salmonella infection in chicks following the consumption of artificially contaminated feed, 247
Salmonellas, the vertical transmission of, and formic acid treatment of chicken feed, 43
Salmonellosis, costing of a hospital-based outbreak of poultry-borne, 35
Salmonellosis, extraintestinal, 361

Salmonellosis, poultry meat as a source of human, in England and Wales, 175
***Streptococcus pyogenes*, changes in the pattern of infection caused by, 257**
Sudan, occurrence of multiple antibiotic resistance and R plasmids in Enterobacteriaceae isolated from children in the, 73

Toxoplasmosis, enzyme-linked immunosorbent assays for the measurement of specific antibodies in experimentally induced ovine, 205
